

BRT Veyron Series City Bus

This city bus is part of the BRT Veyron series, designed for rapid transit systems. It features a robust chassis, efficient climate control, and a powerful engine optimized for fuel efficiency and reduced emissions.

Overview

BRT Veyron Series City Bus

The Veyron series is a specialized city bus model engineered specifically for Bus Rapid Transit (BRT) systems. It features a streamlined, modern design with a large windshield and robust chassis, ensuring both aesthetic appeal and high-frequency urban performance. Designed for durability and passenger comfort, this vehicle integrates advanced braking systems, efficient climate control, and comprehensive electronic diagnostics to meet the rigorous demands of public transit.

Technical Specifications

Design Highlights

Streamlined Front Fascia • Enhanced Visibility • Electronic Diagnostics

Model Number	CKZ6127HN3
Primary Application	Bus Rapid Transit, Urban Transport, High-Frequency Transit

Key Features

Safety & Performance Metrics

1 System

Robust Chassis

1 System

Advanced Braking System

Interior Features

- Optimized passenger capacity
- Durable seating configuration
- Efficient climate control system
