Product Overview

High-Performance Brush Cutter Blade

This 255mm 40T brush cutter blade is engineered for heavy-duty vegetation management, featuring durable carbide tips for extended service life. Designed for versatility, it excels at cutting through wood, brush, and dense shrubs in agricultural, forestry, and landscaping applications. The blade's balanced design minimizes vibration and fatigue, making it an essential accessory for professional-grade brush cutters and trimmers.

Technical Specifications

Maximum Rotational Speed

10000 RPM

Max RPM

Maximum Diameter	255 mm
Bore Diameter	25.4 mm
Thickness	1.3 mm
Tooth Count	40
Material	Carbide Tip

Usage & Compatibility

Cutting Capabilities

- Wood
- Brush
- Shrubs
- Weeds
- Brushwood

Primary Applications

Carpentry, Lawn Mowing, Animal Husbandry, Aquaculture, Agriculture, Forestry, Fishery
