

Brushed DC Motor

This brushed DC motor features a cylindrical body with a shaft extending from the top. Electrical contacts at the bottom allow for power connection.

Overview

Compact Brushed DC Motor

The RC-280SA-20120 is a reliable brushed DC motor designed for a wide range of rotational motion applications. Featuring a compact cylindrical form factor, this motor is well-suited for robotics, small-scale automation, and hobbyist engineering projects. It provides consistent performance and is built for straightforward integration into existing electrical systems.

Technical Specifications

Rated Voltage

120 V

Voltage

Motor Type

Brushed DC

Model Number

RC-280SA-20120

Production Batch Code

H65571

Applications

Typical Applications

- Robotics
- Automation Systems
- Hobby Projects
- Rotational Motion Devices
