

Brushless DC Motor for Vacuum Cleaners

This brushless DC motor is designed for handheld vacuum cleaners. Its compact size and strong suction power ensure efficient and reliable operation.

Overview

High-Performance Brushless DC Motor

This advanced brushless DC motor is specifically engineered for high-performance handheld vacuum cleaners. It combines high rotational speed with a compact form factor to deliver exceptional suction power. Built for reliability and efficiency, it serves as an ideal solution for modern portable cleaning appliances requiring superior performance.

Key Features

Performance Advantages

High Rotational Speed, Compact Size, Strong Suction, High Efficiency

Application

Primary Applications

- Handheld Vacuum Cleaners
- Portable Cleaning Appliances

Technical Specifications

Motor Technology

Brushless DC
