

Brushless DC Motor for Vacuum Machines

This brushless DC motor is designed for vacuum machine applications. It features a durable metal casing for robustness and efficient heat dissipation.

Product Overview

High-Performance BLDC Motor

This brushless DC motor is expertly designed for high-efficiency vacuum cleaner applications. Featuring a durable metal casing for superior heat dissipation, it offers an extended lifespan and significantly reduced operational noise compared to traditional brushed motors. Its compact design and precision-engineered components make it an ideal choice for professional-grade vacuum machine assemblies.

Technical Dimensions

Physical Dimensions

Parameter	Value
Motor Diameter	27.7mm
Overall Length	32.2mm
Shaft Diameter	2.3mm
Approximate Weight	90g
Mounting Holes	M2.6x0.45 (JIS)

Mounting Details

- 8 mounting holes with radius of 1.5mm
- Central bore diameter of 10mm
- Direction of rotation indicated

Electrical Performance

Operating Characteristics

12 V

Operating Voltage

90 g

Approximate Weight

Available Motor Models

BLDC2832B0W0, BLDC2832B1W2
