

Brushless DC Motor for Vacuum Machines

This brushless DC motor is designed for vacuum machine applications. Its features include a compact size, long lifespan, and efficient energy consumption.

Product Overview

High-Performance Brushless DC Motor

This brushless DC motor is specifically engineered for vacuum machine applications, offering a compact design with exceptional energy efficiency. Its durable construction ensures a long operational lifespan, making it an ideal component for various household electrical appliances and vacuum cleaners. The unit features standard color-coded wiring to simplify integration and installation for professional manufacturers.

Physical Dimensions

Physical Specifications

27.7 mm

Diameter

37.5 mm

Length

110 g

Weight

Mounting & Hardware

- Mounting holes: M2.6x0.45 (JIS)
- Shaft radius: 0.9 mm

Electrical Specifications

Wiring Color Codes

White, Gray, Brown

Performance Data
