Product Overview

High-Performance Nano Ultrasonic Hair Dryer

This professional-grade hair dryer utilizes a high-speed brushless DC (BLDC) motor to deliver a powerful 18L/S airflow, increasing drying efficiency by 30% for deep root penetration and rapid drying. Equipped with advanced PID temperature control and water ion technology, it actively nourishes hair while preventing heat damage. The device also features negative ion emission to eliminate static, ensuring a smooth and salon-quality finish.

Technical Specifications

Airflow

18 L/S

Airflow Rate

Motor Technology

High-Speed Brushless DC

Power

1800 W

Operating Voltage

220-240V

Features & Technology

Modes & Settings

- High/Mid/Low Temperature settings
- High/Mid/Low Air speed settings
- Heat/Cold/Hot&Cold Circulation modes

Ion Emission

>10M/CM³

Key Technologies

PID Temperature Control, Water Ion Infusion, Negative Ion Anti-Static, Overheat Protection
