Product Overview

Professional Grade Polishing Performance

Designed for professional paint correction and polishing, this brushless dual-action polisher offers precision and durability. Built with advanced CNC-machined components and high-quality transmission parts, it ensures consistent performance for demanding automotive applications. With variable speed control and multiple eccentricity options, this tool delivers the versatility required by detailing professionals.

Technical Specifications

Rated Voltage

- 110V/60Hz
- 230V/50Hz

Rated Input Power

780 W

No Load Speed

2000-4800

Disc Size

150 mm

Available Eccentricity

8mm, 12mm, 15mm, 21mm

Features & Construction

Key Features

Brushless Motor • Soft Start • Variable Speed Dial • High Efficiency Heat Dissipation • CNC Gear Case

Build Materials

- 20CRMNTI core components
- Integrated shaft and teeth
- Fish scale antiskid rubber
- Imported bearings
