

Brushless Electrical Power Generator

This electrical generator is designed for various power generation applications. The generator features a brushless design, reducing maintenance and enhancing its lifespan.

Product Overview

TFW2 Series Power Solutions

The TFW2 Series brushless, three-phase synchronous generators are engineered for high-performance power generation across industrial, commercial, and residential sectors. Designed to meet international standards for diesel or gasoline-driven applications, this series provides exceptionally stable voltage regulation and low harmonic distortion. These units are built to withstand challenging environments, including moist tropical and marine conditions, while offering a compact footprint for easy integration.

Technical Specifications

Power Output

8 KW Minimum Output	1000 KW Maximum Output
-------------------------------	----------------------------------

Phase Configuration	Three-phase synchronous
Design	Brushless
Standard Compliance	GB/T15548-95

Operating Conditions

Ambient Temperature	40 °C
Operating Altitude	1000 m
Relative Humidity	Up to 90%
Environment Suitability	Moist Tropical, Marine

Customization

Manufacturing Options	Yes
-----------------------	-----
