

Brushless Motor Controller 450W

This brushless motor controller operates at 48V and 23A. It delivers 450W of power and features a throttle voltage range of 1-4V.

Overview

RKW09 Series Brushless Motor Controller

The RKW09 series brushless motor controller is designed as a universal solution for electric motor management. Engineered to support a 450W power output, it provides reliable performance and consistent control for various applications. This unit is built to handle standard operational parameters, ensuring compatibility and ease of integration for your motor systems.

Technical Specifications

Rated Power	450 W
Rated Voltage	48 V
Rated Current	23 A
Throttle Voltage Range	1-4V
Model Number	RKN094BAI-LJ
Series	RKW09
