

Brushless Motor Controller for Electric Bicycles

Intelligent brushless motor controller designed for electric bicycles. It has a rated voltage of 60V, a rated current of 40A, and a power rating of 1200W.

Overview

Intelligent Brushless Controller

The RKD18 series intelligent brushless motor controller is engineered specifically for high-performance electric bicycles. Designed for reliability and efficiency, this unit supports a robust 1200W power output, making it suitable for demanding e-bike applications. Its precise control capabilities ensure smooth operation and consistent performance for daily commuting or heavy-duty use.

Technical Specifications

Rated Voltage	60 V
Rated Current	40 A
Power Rating	1200 W
Battery Voltage	1.4 V

Identification

Series & Model

RKD18

Series

L39
