

# BT30 CNC Machine Tool Pull Nail

This BT30 pull nail is designed for CNC machine tools. It is manufactured with high-quality materials to ensure durability and reliable performance.

## Overview

### Precision BT30 Tool Retention

This BT30 pull nail is engineered for high-performance CNC machine tool applications. Designed with a focus on durability and reliable performance, it ensures secure tool retention within BT30 spindle systems. Its robust construction and precise threading make it an essential component for consistent milling and machining operations.

## Technical Specifications

Spindle Compatibility	BT30
Component Type	Pull Nail / Retention Knob

## Key Features

Key Features	Precision Engineered, High Durability, Secure Locking, Reliable Retention
