

BT30 Finger Style Tool Changer Gripper Forks

These BT30 finger style gripper forks are automatic tool changer clamps used in carousel tool magazines. They are widely used in auto tool changer CNC machines.

Product Overview

BT30 Tool Changer Gripper Forks

These finger-style gripper forks are essential components for automated tool changing systems in CNC machines. Engineered from high-quality, reinforced POM plastic, they provide a secure and reliable grip on BT30 toolholders during the exchange process. Their design balances strength and flexibility to ensure smooth operation, high precision, and protection against toolholder damage.

Technical Specifications

Dynamic Balance Grade	G2.5
Max Rotation Speed	30000 rpm
Yaw Precision	0.005 mm

Material & Construction

Material	Imported POM Plastic
Material Properties	Reinforced, Anti-explosion, High-strength

Compatibility

Compatible Toolholder Types

- BT30

Application

CNC Automatic Tool Changer • ATC Tool Magazine
