

Built-In Dual Zone Oven

This built-in oven features a stainless steel exterior with a black glass control panel. It is designed with two compartments, each having its own horizontal bar handle for easy access.

Product Overview

Dual Zone Built-In Oven

This professional-grade built-in dual zone oven is designed for seamless integration into modern kitchen cabinetry. Featuring a sleek stainless steel exterior and a sophisticated black glass control panel, it offers a refined aesthetic suitable for commercial or high-end residential settings. The dual-compartment design allows for versatile cooking or warming applications, controlled via an intuitive digital interface.
