

Built-In Electric Oven with Digital Display

This built-in electric oven features a digital display and multiple cooking functions. It has temperature control up to 220°C, a stainless steel design, and a glass door.

Product Overview

The Intelligent Electric Oven

This high-performance built-in electric oven is designed for professional and high-end culinary environments. It features an intuitive digital display interface that simplifies precision cooking and time management. The robust stainless steel construction combined with a clear glass monitoring door ensures both durability and ease of use for demanding kitchen tasks.

Technical Specifications

Maximum Temperature	220 °C
Installation Type	Built-in
