

Built-In Gas and Ceramic Hob with Multiple Burners

This built-in hob features multiple gas burners and a ceramic heating element. The design integrates seamlessly into kitchen countertops, offering both gas and electric cooking options.

Overview

Versatile Cooking Performance

This built-in hob combines the precision of gas cooking with the convenience of a ceramic heating element, offering a flexible solution for modern kitchens. Designed for high efficiency, the gas burners deliver up to 3.3kW of power, ensuring rapid and oxygen-rich combustion for consistent heat. The sleek black glass surface is both aesthetically pleasing and easy to clean, while the intuitive front-mounted controls and dual ignition options provide a seamless user experience.
