

Built-in Gas and Hotplate Hob

This built-in hob features four gas burners alongside a single hotplate. It is designed for seamless integration into kitchen countertops.

Product Overview

Versatile Hybrid Cooking Solution

This built-in hob combines the efficiency of four gas burners with the convenience of an additional electric hotplate, offering a flexible cooking solution for modern kitchens. Designed with a sleek 8mm tempered glass surface, it provides both durability and a professional aesthetic. The unit features multiple burner types to accommodate various cooking needs, from rapid boiling to gentle simmering.
