

Built-In Induction Cooktop with Touch Controls

This induction cooktop is designed for efficient and safe cooking. It features a smooth glass surface, touch controls, and safety features, making it ideal for modern kitchens.

Product Overview

Built-In Induction Cooktop

This modern built-in induction cooktop offers rapid, efficient heating with precise multi-level power adjustments to suit various cooking requirements. Designed for safety and convenience, it features advanced protective measures including pan sensors, child locks, and residual heat indicators. The flameless technology ensures a cleaner cooking environment, free from gas-related risks, while providing high energy efficiency for professional and home kitchens.
