

Built-In Kitchenware Sterilizer

This built-in sterilizer is designed for maintaining hygiene in the kitchen. It features a sleek design with a black finish, stainless steel trim, two drawers with rectangular handles and a control panel at the top.

Product Overview

Professional Kitchen Hygiene

This high-capacity built-in kitchenware sterilizer is designed for seamless integration into modern culinary environments. Featuring a sophisticated black finish with stainless steel accents, it offers a dual-drawer configuration for organized and efficient sanitization of kitchen utensils. The integrated digital control panel ensures precise operation to maintain superior hygiene standards in professional and high-end residential kitchens.
