

Bulb Planter Tool with T-Handle

This bulb planter is designed for efficiently planting bulbs and seedlings. It features a durable metal construction with a T-shaped handle, a cylindrical body with a stepped, serrated edge, and a side-discharge mechanism for precise placement.

Product Overview

Professional Bulb Planting Solution

This bulb planter tool is designed for efficient and consistent planting of bulbs and seedlings. Constructed with durable steel and an ergonomic T-handle, it ensures reliable performance across various soil types. The integrated spring-loaded mechanism and serrated edge facilitate easy soil penetration and precise bulb placement, making it an essential tool for professional landscaping and gardening tasks.
