

Bulbized Lens LED Panel Light

This LED panel light provides uniform and efficient illumination. The bulbized lens design enhances light distribution and reduces glare.

Product Overview

High-Performance LED Panel Lighting

This advanced LED panel light integrates specialized lens technology with high-efficiency LEDs to deliver superior illumination. Designed for versatility, it features a modular structure that simplifies assembly and installation, making it an excellent choice for various commercial and residential projects. With a focus on longevity and performance, this panel provides consistent, flicker-free light while maintaining a competitive edge in durability and energy efficiency.

Key Features

Key Advantages

- Advanced lens technology for enhanced light distribution
- High luminous efficacy up to 120lm/W
- Low glare design (UGR<19 available)
- Non-flicker operation
- Modular design for easier SKD assembly
- High power factor
- Never-yellowing light output

Technical Specifications

Detailed Specifications

Size	Power	Luminous Flux	Dimension
600x600	48W	4800lm	595x595x30mm
600x600	60W	6000lm	595x595x30mm
300x1200	36W	3600lm	295x1195x30mm
300x1200	40W	4000lm	295x1195x30mm
300x1200	48W	4800lm	295x1195x30mm
600x1200	48W	4800lm	595x1195x30mm
600x1200	60W	6000lm	595x1195x30mm

General Parameters

30000 hrs

Lifespan

110 °

Beam Angle

80 >

CRI

Compliance & Installation

Installation Options

Suspension • Recessed • Surface Mounting

Certifications & Standards

CE Compliant, Non-flicker, High Power Factor

Warranty Period

3 years
