

Bulk Carrier Vessel for Dry Cargo

This bulk carrier vessel is designed for transporting unpackaged dry bulk cargo such as grains, coal, ore, and cement in its cargo holds. Equipped with cranes for loading and unloading cargo in ports lacking shore-based equipment, it is suitable for international maritime trade and transportation of bulk commodities.

Overview

Bulk Carrier Vessel Capability

This bulk carrier vessel is expertly designed for the efficient transport of unpackaged dry bulk commodities, including grains, coal, ore, and cement. Featuring a high freeboard and multiple secure cargo holds with robust hatch covers, it ensures cargo integrity during long-haul maritime voyages. The vessel is equipped with integrated cranes, providing self-loading and unloading capabilities for ports that lack shore-based infrastructure.

Vessel Configuration

Key Features

- High freeboard design
- Multiple cargo holds
- Secure hatch covers
- Stern-located bridge structure
- Integrated cargo cranes

Suitable Cargo

Grains, Coal, Ore, Cement

Operational Metrics

Port Compatibility

Self-unloading capable • International trade ready
