Overview

High-Efficiency Straw Packaging

The SBP-6000 is a high-performance bulk paper straw packaging machine designed for efficient and reliable automated operations. It features advanced PLC control and photoelectric detection for precise counting and seamless packing. With its versatile speed and adjustable length settings, this machine offers a robust, cost-effective solution for high-volume production environments.

Performance Metrics

Operational Performance

28 bag/min

Max Packing Speed

850 kg

Machine Weight

Technical Specifications

Machine Specifications

Parameter	Value
Model	SBP-6000
Film Thickness	18-60 Micron
Max Film Width	550 mm
Bag Length	150-600 mm
Packaging Width	80-260 mm
Packaging Height	30-70 mm

Features

Key Capabilities

- Automatic counting, feeding, and packing
- PLC controller for accurate calculation
- Photoelectric detection for high precision
- Independent operation for counting and packing modules
- Trilateral pillow sealing

Control System

Touch Screen Interface, Automatic Length Detection, Replaceable Counting Wheel, Variable Speed Control
