Product Overview

Heavy-Duty Wear Parts Kit

This comprehensive wear parts kit is designed for heavy construction machinery, featuring essential components such as cutting edges, end bits, ripper shanks, and segment groups. Engineered for durability in earthmoving applications, these parts help maintain equipment efficiency and extend service life. The kit is compatible with a wide range of global construction machinery models.

Product Details

Components Included

- Bulldozer cutting edges
- End bits
- Forging segment groups
- Forging ripper shanks
- Grader blades
- Excavator tips and adapters

Material

Carbon steel

Compatibility & Reference

Reference Part Numbers

1386440, 6D9554B, 5D7554B, 336

Market Reach
