

# Bus Interior Ceiling Panel with Integrated Controls

Interior ceiling panel designed for commercial buses with integrated lighting and ventilation. It features a modular design with USB charging ports for passenger convenience.

## ADDITIONAL IMAGES

## Product Overview

### Advanced Bus Interior Console

This integrated ceiling panel is specifically engineered for commercial vehicle interiors, offering a modular solution for passenger comfort and control. It combines essential climate control ventilation with modern amenities like LED lighting and USB charging ports in a durable, lightweight housing. Designed for easy installation and maintenance, this unit enhances the overall passenger experience through its functional and aesthetic design.

## Key Features

### Core Functionalities

**4 units**

Integrated Fans

**2 ports**

USB Ports

## Technical Configuration

### Included Components

- Adjustable air vent louvers
- Integrated LED illumination
- Blue accent lighting
- Modular electronic assembly
- Power and data wiring connectors
- Secure mounting points

Serviceability

Yes

## Design & Materials

### Aesthetics & Build

Attribute	Detail
Primary Material	Durable, lightweight composite
Finish	Silver and Gray
Accent Lighting	Blue LED
Design Style	Modern Modular

## Application

Vehicle Compatibility	Commercial Buses, Passenger Transport, Internal Climate Control, Interior Retrofitting
