Product Overview

High-Visibility Rear Marker Lamp

This rear marker lamp is specifically engineered for the Marcopolo G7 bus model, focusing on enhancing vehicle safety and road regulation compliance. Constructed with durable, high-quality materials, the lamp features internal reflectors and high-intensity LED technology to maximize light output and distribution. Its aerodynamic design ensures seamless integration with the vehicle's aesthetics while offering reliable performance in various weather conditions.

Technical Specifications

Lighting Technology

High-intensity LED • Reflective Design

Key Features

- Aerodynamic design
- Enhanced visibility for low-light conditions
- Durable construction
- Weather-resistant materials
- Easy installation

Compatibility

Marcopolo G7

Maintenance & Installation

Installation

Designed for a precise, secure fit to reduce maintenance downtime and operational costs.
