

Button Cell Batteries

These are compact silver oxide button cell batteries. They are commonly used in small electronic devices such as watches, calculators, and hearing aids.

Product Overview

Compact Power Solutions

These silver oxide button cell batteries are engineered for reliability in small electronic devices. Featuring a compact metallic design, they offer high energy density and an extended shelf life, making them ideal for long-term use. They are commonly utilized in precision instruments such as watches, calculators, and hearing aids.

Technical Specifications

Available Models	LR44, LR1130, LR41
Chemistry Type	Silver Oxide
Form Factor	Button Cell

Key Features

Performance Highlights

1 High

Energy Density

1 Long

Shelf Life

Common Applications

- Watches
- Calculators
- Hearing Aids
- Small Electronic Devices
