

Bypass Loppers with Aluminum Handles

These bypass loppers are designed for efficient and clean cuts on branches and stems. They feature durable aluminum handles for reduced weight and increased leverage, as well as precision-ground blades for smooth cutting action.

Product Overview

Professional Bypass Loppers

These high-performance bypass loppers are engineered for efficient and clean pruning on branches and stems. Featuring durable yet lightweight aluminum handles, they provide excellent leverage for extended use in gardens, orchards, and vineyards. The precision-ground blades ensure a smooth cutting action while the bypass design minimizes damage to the plant, promoting healthy regrowth.

Technical Specifications

Key Features

- Precision-ground blades
- Lightweight aluminum construction
- High-leverage design
- Clean-cut bypass action

Blade Mechanism	Bypass
Handle Material	Aluminum
Primary Applications	Gardening, Orchard Maintenance, Vineyard Pruning
