

Bypass Loppers with Hardened Steel Blades

These bypass loppers are designed for efficient and clean cuts on branches and stems. Hardened steel blades ensure lasting sharpness, while ergonomic handles offer comfortable use and enhanced leverage.

Product Overview

Professional Bypass Loppers

These high-performance bypass loppers are expertly designed for efficient and clean cuts on branches and stems. Featuring hardened steel blades, they maintain lasting sharpness while ensuring a smooth cutting action that minimizes damage to live plants. The ergonomic handle design provides enhanced leverage, making it easier to cut through thicker branches during extended gardening sessions.
