

Bypass Loppers with High-Carbon Steel Blades

These bypass loppers are designed for efficient pruning and cutting of branches. They feature high-carbon steel blades for lasting sharpness and long handles for increased leverage.

Product Overview

Professional Bypass Loppers

These heavy-duty bypass loppers are engineered for efficient pruning and precision cutting of branches. Featuring high-carbon steel blades, they maintain lasting sharpness for clean, professional-grade cuts. The extended handle design provides superior leverage and reach, while the durable, lightweight construction ensures comfort during extended landscaping or gardening sessions.

Technical Specifications

Blade Material	High-Carbon Steel
Cutting Action	Bypass
Handle Materials	Aluminum, Fiberglass

Key Features

Ergonomic Features

- Comfortable non-slip grips
- Extended reach design
- High-leverage handles

Best For

Gardening • Landscaping • Branch Pruning
