Product Overview

Professional Purlin Roll Forming System

This C and Z Purlin Roll Forming Machine is engineered for high-efficiency, versatile manufacturing of structural purlin channels. Featuring a robust construction with Cr12 rollers and cutters for long-lasting durability, it ensures high-quality output without surface damage. The integrated computer control system automates the production flow from decoiling through to cutting, providing precision and consistency for high-volume manufacturing environments.

Technical Specifications

Production Stages

- Decoiling
- Loading
- Molding
- Cutting
- Off-discharging

Roller & Cutter Material

Cr12 with quenched treatment

Compliance & Standards

Industry Certifications

CE, ISO, SGS, Bureau Veritas, TÜV Rheinland

Operational Terms

Production Lead Time

30 days

Production Days

On-site Technician Fee

150 USD/day
