

# C-Channel Light Frame Roll Forming Machine

This roll forming machine is designed for the efficient production of C-channel light frames. It utilizes a rolling mill process to shape metal sheets into precise C-shaped profiles for construction applications.

## ADDITIONAL IMAGES

## Overview

Precision-engineered rollers designed for consistent C-shaped profile production.

## High-Efficiency C-Channel Roll Forming

This C-Channel Light Frame Roll Forming Machine is engineered for the precise and high-speed production of metal studs, tracks, and keels used in lightweight framing applications. It features a robust 18mm steel welded main frame and a multi-station rolling process to ensure consistent profile accuracy and structural integrity. Ideal for high-volume construction projects, the system integrates automated feeding, leveling, and hydraulic cutting to minimize material waste and maximize productivity.

## Performance Metrics

### Key Performance Metrics

**50 m/min**

Max Productivity

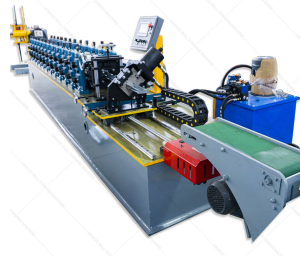

**1.5 mm**

Max Material Thickness

**9.5 kW**

Total Motor Power

## Technical Specifications

The multi-stage forming process ensures high dimensional accuracy for light gauge steel framing.

Compatible Materials	Color steel plate, Galvanized sheet, Aluminum coils
Feeding Material Thickness	0.3 - 1.5mm
Roller Stations	10 rows (customizable)
Roller Material	45# Steel with Cr Plating
Cutter Standard	GCr12
Shaft Diameter	42 mm

## Control & Operation

Control System	PLC Colored Touch Screen
Voltage Requirement	380V 50Hz 3-Phase

## Physical Characteristics

Machine Size	5000 x 800 x 1600mm
Total Weight	2.5 T

parts for roofing sheet roll forming machine  
★★★★★  
linda patiently taught me how to use, my machine is ready for normal production

👍 0

Highly rated supplier performance with proven reliability in international shipments.
