

C13 IEC Power Connector

This C13 connector is designed for electric appliances and complies with VDE standards. It is commonly used to connect devices to a power supply.

Overview

Reliable Power Connectivity

The C13 IEC power connector is a standard interface designed for secure and reliable power transmission. Compliant with the IEC60320-1 standard, this connector features a robust three-pin configuration suitable for grounded connections in various electronic devices. Ideal for computers, monitors, and peripherals, it ensures consistent performance for your hardware setup.
