

# C40 Over-Voltage Protection Circuit Breaker

This C40 rated circuit breaker is designed for electrical systems, providing over-voltage protection. It operates at a rated voltage of 230V and a rated current of 43A, complying with IEC 60898 standards.

## Product Overview

### Reliable Over-Voltage Protection

The C40 Over-Voltage Protection Circuit Breaker is an essential component for safeguarding electrical systems against dangerous voltage spikes and overloads. Designed for professional applications, this unit ensures operational stability by monitoring voltage levels and interrupting the circuit when thresholds are exceeded. It is built to comply with international safety standards, making it a dependable choice for infrastructure and industrial electrical protection.

## Electrical Specifications

Rated Voltage (Un)	230 V
Rated Current (In)	43 A
Maximum Voltage (Vmax)	280 V

## Key Metrics

### Performance Summary

<b>230 V</b> Rated Voltage	<b>43 A</b> Rated Current	<b>280 V</b> Max Voltage
-------------------------------	------------------------------	-----------------------------

## Compliance & Features

### Key Features

- Over-voltage protection
- Overload protection
- Coil indicator
- Voltage indicator

Standards Compliance	IEC 60898
