Product Overview

Cabin Interior LED Downlight

The TD1 series downlight is a specialized lighting solution engineered for cabin interiors, including resting rooms and accommodation areas. It features a robust high-quality steel plate housing finished with a durable white powder coating, paired with a clear acrylic (PMMA) diffuser for optimal light distribution. Designed for reliability and ease of installation, this fixture utilizes constant current and constant voltage driving power with wide voltage input support.

Technical Specifications

Housing Material	High-quality steel plate, white powder-coated surface
Diffuser Material	Clear acrylic (PMMA)
Mounting Method	Fixed by 3 x 5mm mounting holes
Electrical System	Constant current and constant voltage driving power with wide voltage input

Design Options

Available Trim Types

- Type A (Silver Trim)
- Type B (Gold Trim)

Certifications & Standards

Certifications	ABS, BUREAU VERITAS
