

Cabinet Water Softeners for Residential Use

These cabinet water softeners are designed for residential use. They reduce water hardness, preventing scale buildup in plumbing and appliances.

Product Overview

Compact Residential Water Softening

The RL-R100E & RL-R150EO cabinet water softeners provide a streamlined solution for residential water treatment by combining the resin and brine tanks into a single, space-saving unit. These systems are engineered for ease of maintenance and feature transparent display windows for real-time monitoring of performance parameters. Designed to effectively reduce water hardness, they prevent scale buildup in home plumbing and household appliances.

Technical Specifications

Performance Metrics

Feature	RL-R100E	RL-R150EO
Flow range	1.0~1.2m3/h	1.5~2.0m3/h
Suitable tank	1017	1035
Ion exchange resin	12.5L	28L
Dimensions (WxDxH)	490x371x582mm	492x410x1064mm
Suitable for	Families of 2-4	Families of 3-6

Features & Maintenance

Optional Warning Functions

- Lack of salt warning
- Salt insulation warning

Design Highlights

Easy disassembly, Low maintenance, Transparent display window, Compact cabinet design
