Overview

Compact Residential Cabinet Water Softeners

These cabinet-style water softeners are engineered to provide efficient hardness removal for residential applications, protecting your plumbing and appliances from scale buildup. Featuring an integrated salt storage design, these units occupy minimal space while delivering consistent performance through an electronic control valve. Available in two capacity configurations, they are tailored to support municipal water users in households ranging from 2 to 6 people.

Performance

Flow Rate

Model	Flow Range (m ³ /h)
RL-R100H	1.0~1.2
RL-R150HO	1.0~2.0

Technical Specifications

Ion Exchange Resin Capacity

12.5 L RL-R100H Resin	28 L RL-R150HO Resin
---------------------------------	--------------------------------

Unit Dimensions (W*D*H)

- RL-R100H: 480mm * 312mm * 590mm
- RL-R150HO: 484mm * 316mm * 1072mm

Application

Ideal Household Size

2-4 People (RL-R100H), 3-6 People (RL-R150HO)

Features

Key Design Features

Cabinet Design • Salt Insulation Board • Compact Footprint • Easy Maintenance
