

Cable Cutting Tool with Insulated Handles

This cable cutting tool is designed for efficient and clean cuts through various types of cables. The tool features insulated handles for enhanced safety and comfort during use.

Product Overview

Professional Cable Cutting Solution

This heavy-duty cable cutting tool is engineered for efficient and clean cuts across a wide variety of cable types. Featuring specialized curved blades, it ensures optimal cable capture and a precise cutting action for demanding tasks. Equipped with insulated handles, the tool prioritizes user safety and comfort, making it an essential instrument for electrical, construction, and industrial environments.

Key Features

Design Features
