Product Overview

Professional Cable Cutting Solution

This specialized cable cutter is engineered for precision and efficiency, featuring hardened steel blades capable of slicing through copper, aluminum, and steel-core cables without fraying or deformation. The tool is designed to maintain the cable's circular shape, ensuring optimal conditions for proper termination and connectivity. With ergonomic handles designed to reduce fatigue, it is an essential tool for electricians, telecommunications technicians, and professionals requiring reliable cable management.

Technical Specifications

Compatible Materials	Copper, Aluminum, Steel-core cables
Model Identifier	048360038735

Design & Ergonomics

Key Features

- Maintains circular cable shape
- Prevents fraying and deformation
- Reduces user fatigue
- Precision cutting action

Blade Material	Hardened Steel
Handle Design	Ergonomic, High-Leverage
