Product Overview

Cast Resin Straight Through Joint Kits

These professional-grade cast resin straight-through joint kits are engineered for secure and reliable cable connections in harsh or underground environments. Each kit features a robust two-part transparent polycarbonate mold that ensures superior mechanical protection and a waterproof seal. Designed for versatility, they provide excellent insulation for various multi-core cable configurations, ensuring long-term durability in demanding industrial applications.

Model Specifications

Model	Cable Range (mm ²)	Diameter Range (mm)	Length (mm)
M11	6-15	14-26	190
M12	10-25	14-34	260
M13	25-50	21-43	360
M14	50-95	26-48	400

Material Composition

Polycarbonate, Cast Resin, Transparent

Kit Contents

Included Components

- Two-part transparent polycarbonate mold
- Cast resin in foil package
- Insulation tape
- Abrasive cloth
