

Cable-Laid Wire Rope Sling for Heavy Lifting

This cable-laid wire rope sling is designed for heavy lifting applications. It is constructed from multiple strands of wire rope around a central core, providing flexibility and durability.

Product Overview

Heavy-Duty Lifting Solution

This cable-laid wire rope sling is engineered specifically for demanding heavy lifting applications. Constructed from multiple strands of wire rope laid helically around a central core, it offers a superior balance of exceptional flexibility and rugged durability. It is an ideal choice for complex rigging, construction, and industrial lifting tasks where reliability is paramount.

Technical Specifications

Construction	Helical cable-laid wire rope
End Termination	Looped end
Primary Applications	Construction, Rigging, Industrial Lifting
