

Cable Lug and Ferrule Assortment

This assortment includes various types of connectors and lugs designed for wire and cable connections. It features PVC connectors, SC cable lugs, ferrules, terminal blocks, insulated terminals, wire connectors, wire joints, clamps, and copper tubes.

Product Overview

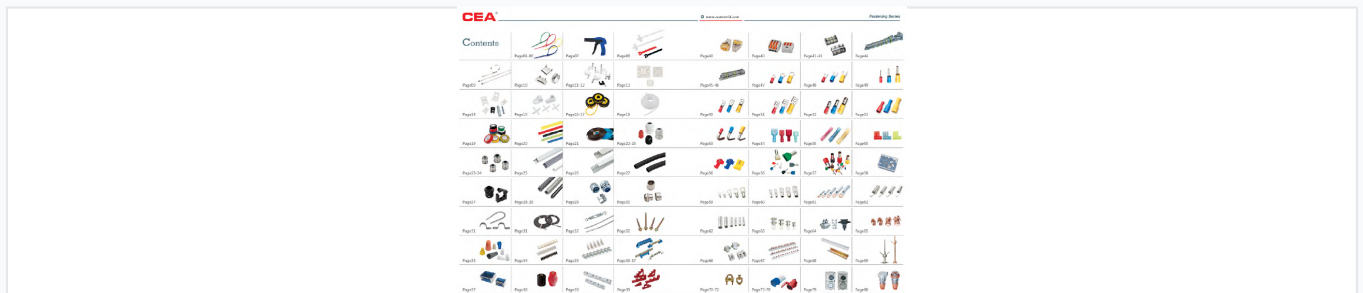

Comprehensive Electrical Connection Solutions

This extensive assortment of cable lugs and ferrules is designed to provide secure and reliable terminations for a wide variety of electrical conductors. The range includes specialized connectors such as SC cable lugs, insulated terminals, and wire joints suitable for industrial, commercial, and residential wiring applications. These components ensure durable, corrosion-resistant connections that maintain optimal performance in power distribution and control panel environments.

Primary Applications

Wire and cable connections or terminal terminations

Component Variety

A wide range of electrical fastening components including lugs, ferrules, and specialized clamps for industrial wiring.

Included Connector Types

PVC Connectors, SC Cable Lugs, Ferrules, Terminal Blocks, Insulated Terminals, Wire Connectors, Wire Joints, Clamps, Copper Tubes, Pierce Clamps, Suspension Clamps

Technical Details

Lug Configurations

- Crimp Lugs
- Ring Terminals
- Fork Terminals

Terminal Block Varieties

- Screw Terminals
- Barrier Strips
- DIN Rail Mountable Blocks

Material Benefits

Corrosion-Resistant • Durable • High Conductivity
