

Cable Management End Cap

This plastic end cap is designed for cable management systems. It offers a clean finish to cable trays, preventing dust and protecting cables in data centers, offices, and industrial environments.

Product Overview

Professional Cable Management Solution

This white plastic end cap is designed for use with cable management systems, providing a clean and professional finish to open cable trays or trunking. It effectively prevents dust and debris from entering the system while protecting sensitive cables from potential damage. Engineered from durable materials, this component ensures a secure fit and long-lasting performance in various environments, including data centers, office spaces, and industrial settings.

Physical Attributes

Material	Durable Plastic
