

Cable Tie Tensioning and Cutting Tool

This tool is designed for tensioning and cutting cable ties. It features adjustable tension settings and an integrated cutting blade for clean trimming.

Overview

Professional Cable Tie Installation Tool

This durable metal tensioning and cutting tool is designed for fast and efficient binding of wires and cables. It features an automatic cutting mechanism that cleanly removes the excess tie material once the desired tension is reached. Ergonomically designed for professional use, it ensures consistent results across various electrical and industrial applications.
