

Cable Wrapping Machine for Cable Production

This wrapping machine is designed for cable production, extrusion, steel-armoring, and rewinding lines. It facilitates cable production with its caterpillar haul-off functionality.

Product Overview

Professional Cable Wrapping Solution

This high-speed wrapping machine is engineered for precision in cable production lines. It features multiple rotating heads with adjustable tension control, ensuring consistent and reliable performance. Constructed with heavy-duty materials, it offers enhanced durability and stability for industrial cable manufacturing environments.

Technical Capabilities

Suitable Applications

- Cable production lines
- Extrusion lines
- Steel-armoring lines
- Rewinding lines
- Caterpillar haul-off systems

Core Features

High-speed wrapping, Adjustable tension control, Multiple rotating heads, Safety integrated

Design and Quality

Construction

Heavy-duty • Stable • Durable
