

Cage Induction Motor

This is a cage induction motor with extra-high slip characteristics. The motor type is designated by the letters Y, C, and H and indicates the number of poles and frame number.

Overview

High-Performance Cage Induction Motor

This cage induction motor is engineered for demanding industrial applications requiring extra-high slip characteristics. Designed for reliability and versatility, it features clear markings for pole count and frame size to ensure seamless integration into existing systems. Its robust construction makes it an ideal solution for machinery requiring specific torque-speed profiles.

Technical Specifications

Slip Characteristic

Extra-High Slip

Key Parameters

- Number of poles
- Frame number

Motor Type

Cage Induction Motor (YCH Series)

Designation Codes

Y, C, H
