

# Caliper Brake Set for Bicycles

This caliper brake set is designed for bicycles. It features durable construction with a chrome finish and provides reliable stopping power.

## Product Overview

### Reliable Caliper Brake System

This high-quality caliper brake set is engineered for consistent and reliable stopping power. Constructed with durable steel and finished in both ED and CP coatings, it offers excellent longevity and resistance to the elements. The design includes dual linear spring tension adjustment, allowing for precise customization to suit various bicycle setups and rider preferences.

## Technical Specifications

Material	Steel, ED Finish, CP Finish
Adjustment Features	Dual linear spring tension adjustment
Model Identifier	BK-707009
