Product Overview

Professional Cargo Lashing Solution

These cam buckle tie-down straps are designed to save time and effort, allowing for efficient one-person operation. Constructed from high-strength, acid-resistant fiber materials, they ensure both safety and durability during transport. The flat ribbon design distributes force evenly to prevent damage to sensitive goods, while the quick-release cam buckle mechanism ensures secure, instant fastening.

Key Features

Benefits

- One-person operation
- Acid-resistant fiber materials
- Soft, force-distributing flat ribbon
- Quick-release cam buckle mechanism
- Toothed bar for enhanced grip

Material Characteristics

Acid-resistant, High-strength fiber, Zinc-plated metal

Hardware Specifications

Buckle Construction

Zinc-plated • Spring-loaded mechanism • Toothed bar

Buckle Functionality

Spring-loaded cam mechanism for easy tensioning and quick release
