Product Overview

High-Performance Cargo Security

These cambuckle tie-down straps are engineered from high-tensile, 100% polyester yarns, ensuring exceptional durability and low elongation for reliable cargo management. Designed for quick, easy, and secure lashing, they provide a long service life even under demanding conditions. These straps are essential tools for securing luggage, camping gear, and various equipment during transport, offering wear resistance and consistent performance.

Technical Specifications

Performance Characteristics

- Low elongation
- High wear-resistance
- Long service life
- Quick and secure lashing mechanism

Material Composition	100% High Tensile Polyester
Compliance Standards	DIN 60060, EN 12195-2

Usage Guidelines

Safety Warning

NOT FOR LIFTING

Typical Applications

- Cargo management
- Securing luggage
- Camping gear transport
- General tie-down applications
