

Canned Food Packaging Machinery

This machinery is designed for the efficient packaging of canned foods. It ensures products like fruits and vegetables are securely sealed in metal containers for preservation.

Product Overview

Professional Canned Food Packaging Solutions

This industrial packaging machinery is engineered for the precise sealing and labeling of canned food products, ensuring product integrity and shelf-life stability. Designed to handle various fruit and syrup-based products, it supports high-volume output while maintaining consistent packaging quality. Ideal for food processing facilities looking to streamline their canning operations and meet international food safety standards.

Technical Specifications

Typical Applications

- Loquats in syrup
- Chinese plums in syrup
- Sliced pineapple in juice

Supported Packaging

Metal Cans, Syrup-packed Fruits, Juice-packed Fruits

Performance Metrics

Standard Can Weight

255 g

Net Weight

Compliance & Standards

Compliance Badges

Food Grade Materials • Industrial Standard
